PO BOX 1178
RIVERTON UT 84065

Dear Mr. Dunlop:

Your notices to conduct mining related operations on unpatented mining claims, located in, Sec. 5 & 6, T. 14 S., R. 19 W., and Sec. 13, T. 12 S., R. 7 W. SLBM, was received on March 1, 2000, and has been accepted by this office. Your notices have been assigned case file numbers UTU-075887 (Pleasant Valley), and UTU-075888 (Desert Mountain) respectively. Please use these numbers in any future correspondence concerning these notices.

If you change your operations from what is described in your notices, you are required to contact this office prior to the change. If your operation extends for more than one year, please advise this office on the status of your mining related activity on the anniversary date of your notice.

Enclosed is a copy of the Conditions of Acceptance for BLM Mining Notices, stipulated by the Fillmore Field Office. Please follow these guidelines as they pertain to your operation.

We are of the preliminary opinion the deposit you have claimed is "common variety" and, as such, is not open to location. The proper procedure for mining and disposal of this material is through 43 CFR 3610, mineral material sales, wherein you would relinquish your claims and sign a contract with the Bureau of Land Management to purchase the material at a

DIVISION OF
OIL, GAS AND MINING

0004

specified price. We will gladly provide you with information regarding mineral material sales.

If you are convinced that your deposit is locatable, please be aware the Court has set standards to distinguish between common varieties and uncommon varieties of mineral deposits or stone. The standards are:

1. There must be a comparison of the mineral deposit in question with other deposits of such minerals generally;
2. The mineral deposit in question must have a unique property;
3. The unique property must give the deposit a distinct and special value;
4. If the special value is for uses to which ordinary varieties of the mineral are put, the deposit must have some distinct and special value for such use; and
5. The distinct and special value must be reflected in the market place (or in reduced cost or overhead so that the profit to the claimant would be substantially more).

Should a final determination by the Department of Interior be made that this material is, in fact, "common variety", you could be responsible to the United States for the value of this material, damage to the land, and the administrative costs of recovering such compensation.

A copy of your notice has been sent to the Utah Division of Oil, Gas and Mining (UDOGM); therefore, you will not have to file this notice with them. Although, UDOGM requires a yearly small miners permit to be obtained by you before any operations commence.

Also, all mining claimants and operators intending to use, store, or divert water are required by Utah and Federal statute to notify the following agencies:

Utah Department of Water Resources
1636 West North Temple
Salt Lake City, Utah 84180-1203

and

Bountiful, Utah 84010

A permit for explosives may be required from the Bureau of Alcohol, Tobacco, and Firearms (ATF). The address for ATF is:

125 South State Street
Salt Lake City, Utah 84145

If ATF requires a permit, a copy of the permit should be submitted to this office.

You are required to report to this office, all hazardous materials associated with your operation along with information regarding their use, storage, transport, quantity, generation and disposal. Information regarding hazardous materials can be obtained from the State of Utah, Department of Environmental Quality, Division of Solid and Hazardous Waste at:

288 North 1460 West
Salt Lake City, Utah 84114-4880

You are required to contact the Department of Environmental Quality (DEQ), Emergency Response Section (ERS) at the Section's 24-hour response number (801-536-4123) immediately of a spill or discharge of hazardous substances.

If you are selling any minerals extracted during your mining activities, the U. S. Department of Labor, Mine Safety and Health Administration (MSHA) may consider your operation to be under its jurisdiction. We recommend you contact them at

USDOL Mine Safety and Health Administration
125 South State, Room 8220
Salt Lake City, UT 84138

DIVISION OF
OIL, GAS AND MINING

Failure to follow all State, Local, and Federal guidelines, laws and or regulations while operating on public lands may result in the issuance of a Notice of Noncompliance from the BLM.

As required by 43 CFR 3809, Surface Management Regulations, reasonable measures must be taken to prevent unnecessary or

undue degradation of public lands and reclamation is required at the earliest feasible time. Please notify this office upon completion of operations and reclamation so an inspection may be conducted on the site. Reclamation under this notice is required to conform to the standards of the Utah Mined Land Reclamation Act.

Also, our Noxious Weeds Specialist has determined that an infestation of squarrose knapweed is within your proposed area of operation. Precautions should be taken to prevent the spread of seed to other areas. Equipment used for operations should be left on site until the project is complete and then cleaned off adequately before it is transported off site (an air compressor would work). Vehicles used for daily transportation should stay on existing roads.

Acceptance of your notice will not now, nor in the future, serve as a determination of the validity nor ownership of any mining claim included under your notice.

If you have any questions regarding this letter, please feel free to contact Larry Garahana at (435) 743-3126. Thank you for submitting your notice.

Sincerely,

Rex Rowley
Field Manager
